

SENTINEL^{plus}[®]

DELIVERING THE SAME DURABILITY
& RELIABILITY, SIMPLY SMALLER.
NOW THAT'S A PLUS!

ADVANCED TECHNOLOGY

The SENTINEL^{plus}® Enteral Feeding Pump is an improved version of our popular SENTINEL® product. The lighter, more compact design brings the same simplicity and reliability of its predecessor.

DUAL DISPLAY

The bright LED display allows caregivers to simultaneously and conveniently view the infusion rate and volume delivered from a distance.

ADVANCED MEMORY

The pump operating history is retained until manually erased, even in the event of power failures or when pump is turned off.

DOSE CHECK

A record is kept of the accumulated amount of formula delivered over multiple feedings.

SIMPLE ALARMS

Audible and visual alarms are easily differentiated.

CLOVER-SHAPED ROTOR

The unique clover-shaped rotor allows for easy recognition of pump operation from a reasonable distance.

SPECIFICATIONS

Mechanism	Rotary Peristaltic
Operating Range	5-295 mL/hour in 1 mL increments
Dose Limit	1-2000 mL in mL increments 2000-9999 in 5 mL increments
Dose Accuracy	+ 10% of selected flow rate with ALCOR sets
Occlusion Pressure	Does not exceed 15 psi
Battery	Battery backup 6 hours minimum at 125 ML/hour
Dimensions	15cm H x 20cm W x 9cm D
Weight	1.42kg
Power Options	All country-specific connectors available
